Dear Madam,

Following the positive agreement expressed on 30th January 2020, by the Technical Board of the NF VALIDATION mark (NF102), in its application to the food industry, I beg to inform you that the NF VALIDATION certification has been renewed for the following alternative method:

**Salmonella Precis**

*Certificate reference No.UNI 03/06-12/07, with end of validity 04-Dec.-2023*

The alternative method has been validated by comparison to the reference method NF EN ISO 6579-1 (2017) and following the validation protocol NF EN ISO 16140-2 (2016) for the detection of *Salmonella* spp. in all human food products (by performing validation assays on a broad range of foods), feed products and industrial production environmental samples.

A further letter will mention full conclusions and possible reservations made by the Technical Board. If reservations are mentioned, I ask you to take them into account without any delay.

Yours Sincerely,

[Signature]

Managing Director
Franck LEBEUGLE
