Avis BT_ALOA One Day_2019-11-29(R5)V1.docx

Subject: NF VALIDATION mark

La Plaine Saint-Denis, february 7th,2019

Dear Sir

Following the positive agreement expressed on November 29th,2019, by the Technical Board of the NF VALIDATION mark (NF102), in its application to the food industry, I beg to inform you that the **extension of NF VALIDATION certification** has been granted to bioMérieux for the following alternative method:

ALOA® One Day

Certificate reference No.AES 10/03-09/00, with end of validity 27-Sep.-2024

The alternative method is validated by comparison with the reference method NF EN ISO 11290-1 and its amendment 1 (2017) and according to the validation protocol NF EN ISO 16140-2 (2016) for the detection of *Listeria* spp. and *Listeria monocytogenes* in all human food products (by performing validation assays on a broad range of foods), and industrial production environmental samples. This renewal validated a minor modification in the formulation of ALOA agar.

A further letter will mention full conclusions and possible reservations made by the Technical Board. If reservations are mentioned, I ask you to take them into account without any delay.

Yours Sincerely.

Managing Director
Franck LEBEUGLE
