Subject: NF VALIDATION mark

BIO-RAD

Monsieur Yannick BICHOT
3 Boulevard Raymond Poincaré
92430 Marnes-La-Coquette

La Plaine Saint-Denis, July 10th, 2019

Dear Sir,

Following the positive agreement expressed on July 3rd, 2019 by the Technical Board of the NF VALIDATION mark (NF102), in its application to the food industry, I beg to inform you that the **NF VALIDATION certification has been renewed** for the following alternative method:

RAPID'Listeria *monocytogenes*

Certificate reference No. BRD 07/04-09/98, with end of validity 15-Sept.-2023

The alternative method has been validated for the detection of *Listeria monocytogenes* and other species of the genus *Listeria* by comparison to the reference method NF EN ISO 11290-1 (2017) and following the validation protocol NF EN ISO 16140-2 (2016) in all human food products (by performing validation assays on a broad range of foods) and industrial environmental samples.

A further letter will mention full conclusions and possible reservations made by the Technical Board. If reservations are mentioned, I ask you to take them into account without any delay.

Yours Sincerely,

Managing Director
Franck LEBEUGLE
