

Validation of alternative analysis methods

NF102 – Application to the food industry

Certificate

Certificat No.: **BIO 12/41-03/17**

Extension decision dated: 18-05-2017

Expiry date: 23-03-2021

The Company:

bioMérieux
Chemin de l'Orme
69280 Marcy l'Etoile - France

Is authorized to affix the NF VALIDATION mark on the alternative analysis method cited below, in accordance with the NF VALIDATION general rules and the certification rules NF102 - Validation of alternative analysis methods (Application to the food industry):

SALMA™ One Day

Validated for the detection of *Salmonella* spp.

Technical sheet reference's

Ref. 21385 – version C

This decision attests that the alternative analysis method has been assessed by AFNOR Certification and found to conform to the standards cited in page 2/2 and complementary requirements, as specified in the certification reference document. The principal certified characteristics are the "analytical performances" as defined in the associated validation study summarized report (sensitivity, relative detection level...), available on the certification dedicated website <http://nf-validation.org/en>.

This certificate supersedes all previous certificates. This NF VALIDATION certificate, included 2 pages, is valid until 23rd March 2021. It is subject to the results obtained upon regular controls carried out by AFNOR Certification. Appropriate decision is made by AFNOR Certification in accordance with the NF VALIDATION general rules and certification rules NF102 - Validation of alternative analysis methods (Application to the food industry).

Validation of alternative analysis methods

NF102 – Application to the food industry

Certificate

Certificat No.: **BIO 12/41-03/17**

Extension decision dated: 18-05-2017

Expiry date: 23-03-2021

The alternative analysis method:

SALMA™ One Day

Validated for the detection of *Salmonella* spp.

Manufactured by:

bioMérieux
Route de Dol - BP 54
35270 Combourg - France

Has been certified according to the reference documents and the application scope specified here after:

Validation protocol	NF EN ISO 16140-2 (September 2016): Microbiology of the food chain. Method validation - Part 2: Protocol for the validation of alternative (proprietary) methods against a reference method.
Reference method(s)	NF EN ISO 6579 (December 2002): Microbiology of food and animal feedings stuffs. Horizontal method for the detection of <i>Salmonella</i> spp.
Scope	All human food products (by performing validation assays on a broad range of foods), feed products and production environmental samples from surface areas (excluding environment from primary production stage).
Restriction(s)	None.
Warning	None.
Other informations	Non applicable.

Please send any queries concerning the performances of the certified alternative method to AFNOR Certification.

You may download the validation study summarized report on <http://nf-validation.afnor.org/en>.
